

Precision in Demolition: Stora AG's Experience with **Logifleet AG**

Stora AG specializes in the controlled demolition of concrete and masonry in both renovation and new construction projects. With a modern and high-performance machinery fleet, openings and structural demolitions of all shapes and sizes are executed precisely and professionally — quickly, economically, and on schedule.

Low-vibration work, dust-free execution, reduced noise levels, and the highest level of care are core principles of the company's operations.

Years of experience, in-depth expertise, and innovative solutions enable Stora AG to successfully deliver even complex and demanding projects. Their services range from drilling, cutting, crushing, and pressing to bonded reinforcement solutions.

Beyond technical execution, Stora AG provides comprehensive consultation, tailored problem-solving, strict environmental protection measures, and professional disposal of demolition materials.

Managing Growth with Transparent Time Tracking

Why did Stora AG choose Logifleet?

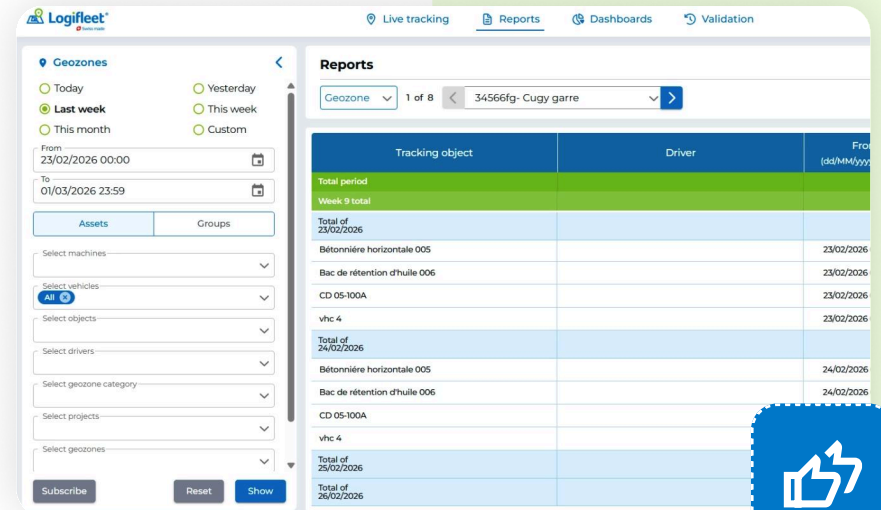

As the company grew, time tracking became increasingly complex and time-consuming. Manual processes required significant administrative effort and made it harder to maintain oversight.

The decision to implement Logifleet was driven by the need for greater transparency, efficiency, and fairness across the organization.

Today, working hours are recorded much faster, more easily, and with complete traceability.

A key advantage is the clear documentation of working hours directly on-site. Discussions with customers regarding billed hours have been eliminated, as time records can be verified at any moment.

Whenever questions arise, it is immediately visible which team is located where — improving both communication and operational coordination.

Working hours are now fully transparent and verifiable at any time.

- Ljubisa Stojanovic - CEO at Stora AG

Optimized Dispatching and Operational Control

Logifleet enables Stora AG to assign employees quickly and efficiently to construction sites.

Recorded hours can be monitored, and discrepancies or errors are identified and corrected promptly.

This results in:

- More efficient workforce planning
- Reduced administrative workload
- Better visibility over ongoing projects

At the same time, the system ensures legally compliant working time recording, increasing operational security.

Tangible Benefits in Daily Operations

The value of Logifleet becomes particularly clear in everyday operations.

If customers have questions regarding recorded working hours, the information can be accessed and verified immediately.

In the event of last-minute changes on-site, management can quickly identify the nearest available team and reassign resources accordingly.

The combination of location tracking and time recording creates clarity — both internally and externally.

Smooth Implementation and Ongoing Support

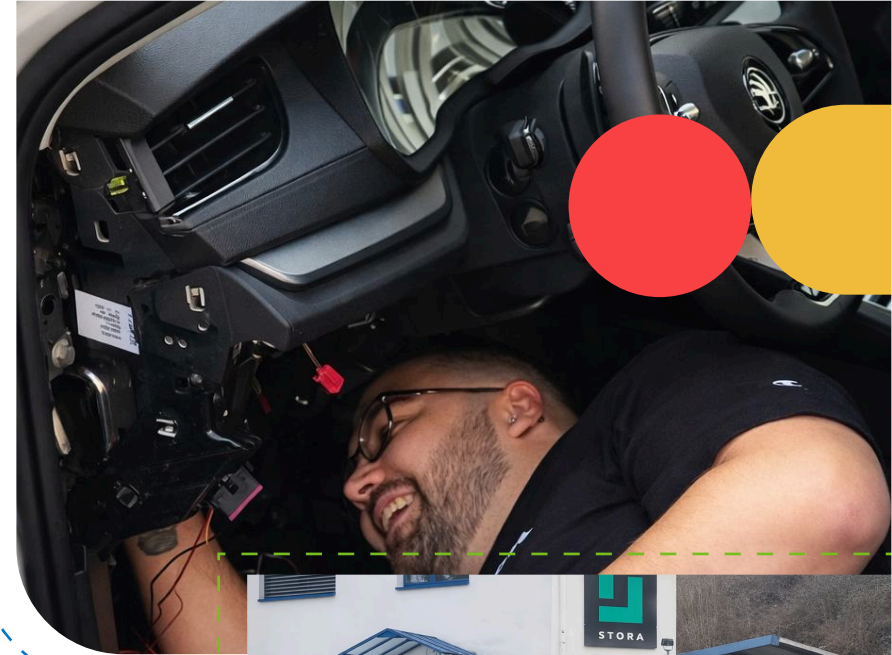

The implementation of Logifleet was smooth and efficient.

Installation and setup were well aligned with internal workflows, ensuring a seamless transition into daily operations.

Since its introduction, the system has operated reliably, supported by consistent, competent, and accessible customer service.

The onboarding process was professional and provided long-term support for daily business needs.

Positive Employee Feedback

Employee feedback has been overwhelmingly positive.

Recorded hours can be monitored, and discrepancies or errors are identified and corrected promptly.

Particularly appreciated are:

- Simplified time management
- Easy and clear recording of working hours
- Transparent documentation serving as proof of work performed

Logifleet is not perceived as a control tool, but rather as a supportive system that enhances fairness and visibility of actual performance.

Supporting Local Communities

For many years, Stora AG has also supported regional sports clubs such as FC Uzwil, FC Uzwil Serben, and FC Wil, actively contributing to the promotion of sports and community engagement in the region.

A Clear Recommendation

Would Stora AG recommend Logifleet?

Yes — without hesitation.

The solution meets expectations and delivers reliability, practicality, and ease of use in everyday operations. The system performs as promised and creates measurable added value for the company.

- Ljubisa Stojanovic - CEO at Stora AG

For Managing Directors : How has operational efficiency improved?

Through Logifleet, Stora AG has:

- Reduced administrative workload
- Improved workforce coordination
- Eliminated disputes regarding recorded working hours
- Increased transparency and fairness within the company
- Ensured compliance with legal working time regulations

Overall, processes have been streamlined, response times shortened, and operational oversight significantly improved.
